

MIRZA BAIG

General Manager, Varahi Asha Hospital
Senior Respiratory Therapist | Critical Care & Ventilation Specialist

Phone: 6301900480 | Hyderabad, Telangana, India

PROFILE

Healthcare leader with a strong dual background in hospital administration and advanced respiratory critical care. Experienced in directing clinical operations, leading multidisciplinary teams, improving workflow efficiency, and maintaining high standards of patient safety, compliance, and service quality. Brings deep expertise in mechanical ventilation, emergency medicine, trauma support, anesthesia technology, and high-acuity patient management.

EDUCATION

ACE Academy, KIMS	Fellowship in Mechanical Ventilation Advanced Respiratory Care & Critical Care Management
Mancherial Institute of Medical Science	B.Sc. Anesthesia Technology
Amsam University of Medical Science	Diploma in Emergency Medicine and Trauma Technician

WORK EXPERIENCE

Varahi - Asha Hospital & Rehabilitation Center

General Manager

- Lead daily hospital operations across clinical and administrative functions to ensure efficient service delivery and continuity of care.
 - Direct multidisciplinary teams, aligning staff performance, patient flow, and operational priorities with organizational goals.
 - Strengthen collaboration between executive management and clinical departments to improve resource utilization and workflow.
 - Implement quality assurance measures, safety standards, and compliance practices across all units.
- Support decision-making with a strong clinical perspective to improve operational effectiveness and patient outcomes.

Senior Respiratory Therapist

- Delivered advanced respiratory and perioperative support in high-pressure clinical settings.
- Managed anesthesia equipment and monitored patient vitals during surgical procedures.
- Supported critical care patient transport, including Level D ambulance transfers and pre-ECMO movement.
- Responded to trauma emergencies and carried out resuscitation support in acute care situations.
- Contributed to safe, effective ventilation and respiratory care for complex patients.
